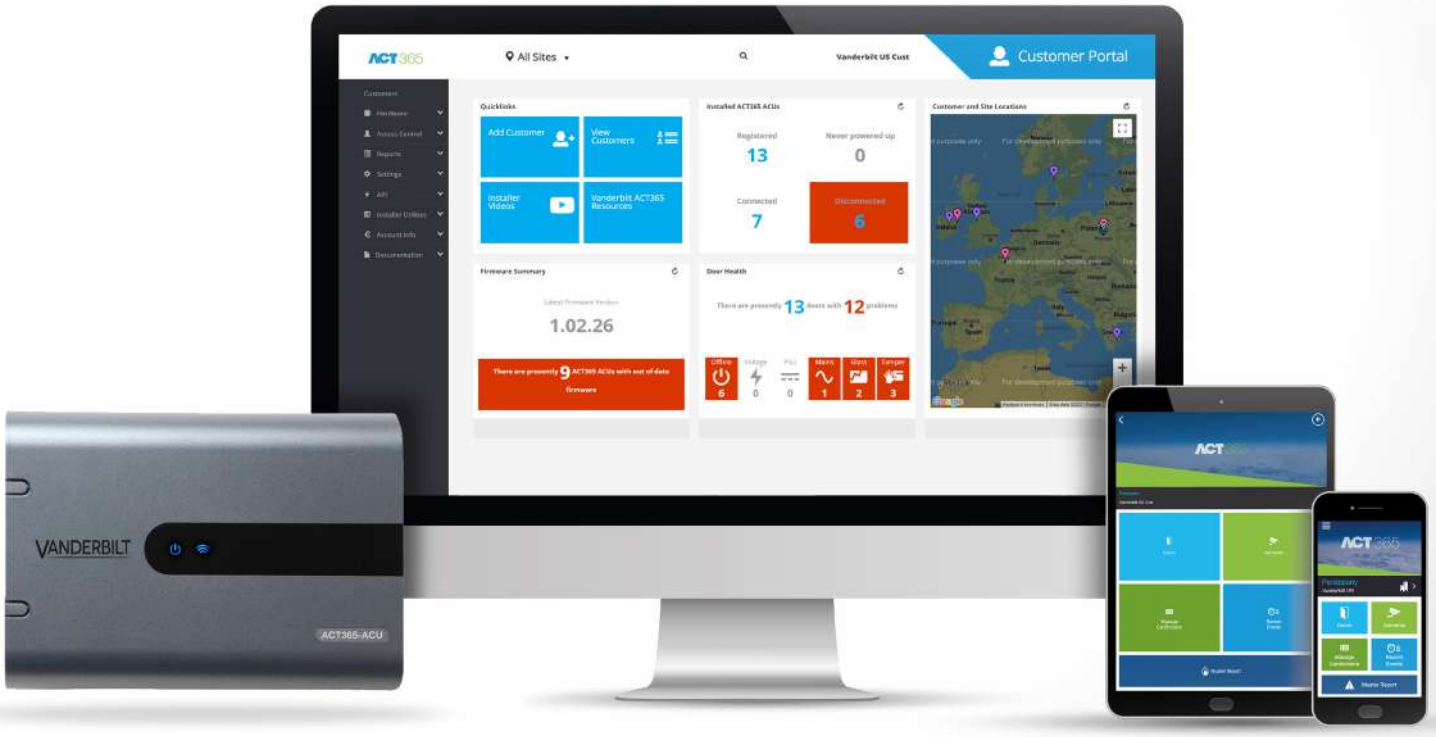
ACT365



Complete Security

Anytime, Anywhere from Vanderbilt

VANDERBILT

vanderbiltindustries.com

ACT365 is a complete cloud based access control and video management solution that enables you to manage your security system from anywhere, at anytime.

Benefits at a glance

- Associate recorded video footage with access control events in a single system
- Always get video verification of cardholder with live views of doors
- Access from anywhere, at anytime and on any device
- Compatible with leading browsers (Internet Explorer, Google Chrome, Firefox)
- Smart Phone App for iOS and Android

ACT365

Access from Anywhere, Anytime and on any Device

ACT365 enables you to watch video footage, disable a user or open a door from any device at any time (PC, Laptop or Smart Phone), meaning that you can truly stay connected to your business wherever you are.

No IT Investment or Headaches

You don't need a Local Server or a PC to run the software, as everything is accessed and managed via the internet. The system benefits from automatic updates, so you can rest assured you are always using the most up-to-date version.

Cloud Based Muster Reporting (Health & Safety)

Using the **FREE** ACT365 App you can take advantage of real time muster reporting on any tablet or Smart Phone, and no need to wait for an emergency list to print.

Multiple Sites

If you have a multi-site business ACT365 helps you to manage all your sites and users from a single, unified friendly interface. PLUS deploying ACT365 across multiple sites is extremely cost effective as there is no need to purchase a local PC for each site.

Sending a QR Code

Customers/visitors can be sent a QR code to their mobile phone, giving them access during a set period. This convenience allows the user to create instant access to premises using the software.
The recipient can then present the QR code to a QR reader during the validity given to be granted access.

Mobile Credentials

A Bluetooth reader and the VCredential software are used to add and distribute virtual credentials to your mobile phone.
To find out more, visit the VCredential page:

https://vanderbiltindustries.com/vcredential

VCU/Video Verification

The video verification is easier than ever before. Within the software, a scroll bar under the video tab allows the user to have instant access to any recent logged events as well as the recorded video.

ACT365 Typical Applications

ACT365 is a cloud based solution that will fit perfectly the everyday needs of any business with Limited IT Infrastructure/Remote use to provide full access control and video verification with any internet connected device.
